Myat Min Khant

Kuala Lumpur, Malaysia | +601164597291 | mmk111203@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Computer science graduate specializing in data science, with hands-on experience building AI-powered pipelines, IoT systems, and full-stack applications. Skilled in Python, SQL, and cloud platforms (Microsoft Azure), with practical exposure to enterprise cloud operations, machine learning workflows, and NLP-driven analysis. Combines technical development with real-world business execution from founding and operating a small business to organizing large-scale community tech events. Seeking full-time, part-time, contract, freelance, or graduate trainee opportunities in data analysis, agentic AI, or software development, bringing a fast-learning, detail-oriented approach and strong cross-functional communication.

Technical Skills and Additional Information

- **Technical and Web Development:** Python, JavaScript, PHP, React.js, Node.js, HTML/CSS, Git/GitHub, MS SQL, Microsoft Azure, Linux fundamentals.
- **Data and Analytics:** Data analysis, report generation, supervised machine learning, SQL, spreadsheet modelling.
- **Soft Skills:** Mentoring/teaching, customer service, fluent English, team leadership, and cross-functional collaboration.
- **Operations and Administration:** Business operations, inventory tracking, event coordination, logistics, Microsoft Excel/Office, data entry.
- **Availability**: Available for part-time, full-time, and contract work, preferably starting December 2026 and January 2027; open to on-site work, relocation, and remote work.

Projects

AIU Postgraduate Monitoring System | ***Final Year Project*** **Aug 2025 – March 2026**

- Documented workflows and validated role-based user journeys for a multi-user platform supporting 500+ users.
- Supported testing by checking key flows and permissions (RBAC) and recording issues for improvements.

Smart Greenhouse Monitoring System (IoT) | ***IoT*** **Jan 2026 – Feb 2026**

- Developed an end-to-end IoT monitoring system for temperature, humidity, soil moisture, and gas levels using ESP32 and sensor integrations.
- Implemented edge decision logic for real-time alerts (irrigation LED and gas buzzer) based on threshold conditions.
- Published JSON telemetry to ThingsBoard via MQTT for live dashboard monitoring and status visualization.

Handwriting Recognition Project | ***Deep learning*** **Dec 2025 – Jan 2026**

- Built a CNN-based handwriting writer classifier (70 classes) designed for offline CPU-only execution.
- Developed script-based pipeline (train.py, run.py, analyze.py) for training, testing, and error analysis.
- Generated reproducible evaluation outputs including prediction CSV and confusion matrix.

ChatGPT App Review Analyzer | ***NLP*** **Nov 2025 – Jan 2026**

- Built an NLP sentiment analysis pipeline in Python to classify 2,290+ app reviews using regex preprocessing and TF-IDF vectorization.

- Trained and benchmarked Linear SVM, Naive Bayes, and Logistic Regression models via Scikit-Learn, achieving a peak accuracy of 80.22%.
- Conducted error analysis via confusion matrices to isolate edge cases and deployed the best model into an interactive real-time demo.

Work Experience

AIA Digital + | ***Cloud Operations intern*** **Apr 2026 – Present**

- Supported MySQL and Microsoft SQL Server operations, including SQL scripting, database tickets, backup reporting, and operational checks.
- Assisted with Windows and Linux infrastructure, including patching, remediation, and disaster recovery checks.
- Used Microsoft Azure, ServiceNow, Dynatrace, PagerDuty, and CyberArk for cloud operations, ITSM, monitoring, and secure access.

Print With Sahel | ***Founder*** **and** ***Owner*** **Apr 2024 - Feb 2026**

- Founded and ran an on-campus print service, managing daily order intake and on-time fulfillment for students and staff.
- Scheduled urgent print and binding requests to reliably meet peak academic deadlines.
- Managed cash flow, paper and ink supplies, and machine maintenance to prevent operational downtime.

Extracurricular and Volunteer Experience

Kedah Maker Fair 2025 | ***Committee Member*** **and** ***Event Organizer***

- Coordinated logistics and technical arrangements for a state-level event involving 66 school teams.

Young Innovators Challenge 2025 (Chumbaka) | ***Mentor*** **and** ***Trainer***

- Guided teachers and students through problem-solving and prototyping (Arduino IoT & Artificial Intelligence).

Education and Technical Certification

- **Certified Data Analyst Professional Certificate (IBM)**
- **Generative AI for Software Development Professional Certificate (Deep Learning.AI)**
- **Bachelor of Computer Science (Honours) | CGPA** - 3.53 **Oct 2023 – Present**
  Albukhary International University (AIU) | Alor Setar, Kedah, Malaysia
  - **Albukhary Foundation Fully Funded Scholarship Recipient**
- **Foundation in Computing | CGPA -** 3.27 **Oct 2022 – Sep 2023**
  Albukhary International University (AIU) | Alor Setar, Kedah, Malaysia
