

Myat Min Khant

(COMPUTER SCIENCE STUDENT)

Kuala Lumpur, Malaysia | +601164597291 | mmk111203@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

A results-driven Computer Science student with a strong foundation in Data Science, cloud operations, software development, and data analytics. Skilled in Python, SQL, web technologies, and enterprise IT tools, with practical experience gained through cloud operations internships, academic projects, and entrepreneurial ventures. Proven ability to develop technology solutions, analyze complex problems, manage business operations, and collaborate effectively with diverse teams. Recognized for leadership in community initiatives, mentoring programs, and event management. Eager to contribute technical expertise, analytical thinking, and a continuous learning mindset to innovative organizations.

Skills

- **Operations & Administration:** Business operations, inventory tracking, event coordination, logistics, Microsoft Excel/Office, data entry.
- **Cloud Operations & Web Development:** Python, JavaScript, PHP, React.js, Node.js, MERN stack Git/GitHub, Linux fundamentals, ServiceNow (SNOW), Microsoft Azure
- **Data & Analytics:** Data analysis, report generation, supervised machine learning, SQL, spreadsheet modelling.
- **Soft Skills:** Mentoring/teaching, customer service, team leadership, cross-functional collaboration.

Projects

AIU Postgraduate Monitoring System | *Final Year Project*

Aug 2025 – Present

- Documented workflows and validated role-based user journeys for a multi-user platform supporting 500+ users.
- Supported testing by checking key flows and permissions (RBAC) and recording issues for improvements.

Smart Greenhouse Monitoring System (IoT) | *IoT*

Jan 2026 – Feb 2026

- Developed an end-to-end IoT monitoring system for temperature, humidity, soil moisture, and gas levels using ESP32 and sensor integrations.
- Implemented edge decision logic for real-time alerts (irrigation LED and gas buzzer) based on threshold conditions.
- Published JSON telemetry to ThingsBoard via MQTT for live dashboard monitoring and status visualization.

ChatGPT App Review Analyzer | *NLP*

Nov 2025 – Jan 2026

- Developed a Python pipeline to analyse 2,000+ reviews and built a simple web interface for predictions.
- Validated outputs, improved consistency, and kept documentation clear for future changes.

Work and Extracurricular Experience

AIA Digital + | Cloud Operations intern

Apr 2026 – Present

- Assisted in IT operations activities involving Incident Management, Change Management, cloud operations, and ticket management using ServiceNow and Microsoft Azure.
- Gained practical exposure to IT governance, compliance procedures, system monitoring, and cross-functional collaboration within a professional enterprise environment.

Print With Sahel | *Founder & Owner*

Apr 2024 - Feb 2026

- Managed operational systems, inventory tracking, and issue resolution.
- Analysed operational data to improve efficiency and service reliability.

Kedah Maker Fair 2025 | *Committee Member & Event Organizer*

- Coordinated logistics and technical arrangements for a state-level event involving 66 school teams.

Young Innovators Challenge 2025 (Chumbaka) | *Mentor & Trainer*

- Guided teachers and students through problem identification, ideation, and prototyping activities.

Community Tutoring | Volunteer Teacher

Jun 2020 - Mar 2022

- Offered after-school lessons to children from low-income families in my area, focusing on subjects they found challenging. Supported their learning and personal growth without charge.

Education and Certificates

- **IBM Certified Data Analyst Professional Certificate**

- **Bachelor of Computer Science (Honours) | CGPA -3.53**

Oct 2023 - Present

Albukhary International University (AIU) | Alor Setar, Kedah, Malaysia

- **Foundation in Computing | CGPA - 3.27**

Oct 2022 – Sep 2023

Albukhary International University (AIU) | Alor Setar, Kedah, Malaysia
